

### Other Authors – Refereed Journal Articles at Vernon

1. Eck, H.V., W.G. McCully, and J. Stubbiendieck. 1975. Response of shortgrass plains vegetation to clipping, precipitation, and soil water. *Journal of Range Management* 28: 194-197.
2. Stubbiendieck, J., and W.G. McCully. 1976. Effect of temperature and photoperiod on germination and survival of sand bluestem. *Journal of Range Management* 29: 206-208.
3. Scifres, C.J., J.L. Mutz, and C.H. Meadors. 1978. Response of range vegetation to grid placement and aerial application of karbutilate. *Weed Science* 26: 139-144.
4. Johnson, D.A., and R.D. Wilcoxson. 1979. Inheritance of slow rusting of barley infected with *Puccinia hordei* and selection of latent period and number of uredia. *Phytopathology* 69: 145-151.
5. Kartchner, R.J., and L. R. Rittenhouse. 1979. A feces-urine separator for making total fecal collections from the female bovine. *Journal of Range Management* 32: 404-405.
6. Kartchner, R.J., L. R. Rittenhouse, and R. J. Raleigh. 1979. Forage and animal management implications of spring and fall calving. *Journal of Animal Science* 48: 425-429.
7. Kingston, B.D., and L.M. Pike. 1979. Internal fruit structure of warty and non-warty cucumbers (*Cucumis sativus* L.). *HortScience* 14: 544-546.
8. Johnson, A.B., F.N. Owens, K.L. Mizwicki, and B.R. Wilson. 1981. Abomasal nutrient infusion of steers fed weathered prairie hay. *Journal of Animal Science* 53: 1401-1405.
9. Allison, C.D., M.M. Kothmann, and L.R. Rittenhouse. 1982. Efficiency of forage harvest by grazing cattle. *Journal of Range Management* 35: 351-354.
10. Johnson, A.B., F.N. Owens, and K.L. Mizwicki. 1982. Abomasal protein infusions for growing steers fed corn grain rations. *Journal of Animal Science* 54: 189-195.
11. Loehle, C., and L. R. Rittenhouse. 1982. An analysis of forage preference indices. *Journal of Range Management* 35: 316-319.
12. Richwine, P.A. 1990. Effect of fall planting date on bulb yield of 'sweet winter' onion in the Rolling Plains of Texas. *HortScience* 25:981.
